

GATE OPERATOR SAFETY

**WILCOX
DOOR SERVICE INC.**

LiftMaster

 **HySecurity**

Are your gates

UL325 Compliant?

wilcoxdoor.com

3 out of 4
gates & operators
lack or need replacements
of necessary safety features.

Why
is this important?

**... to prevent future
accidents or fatalities.**

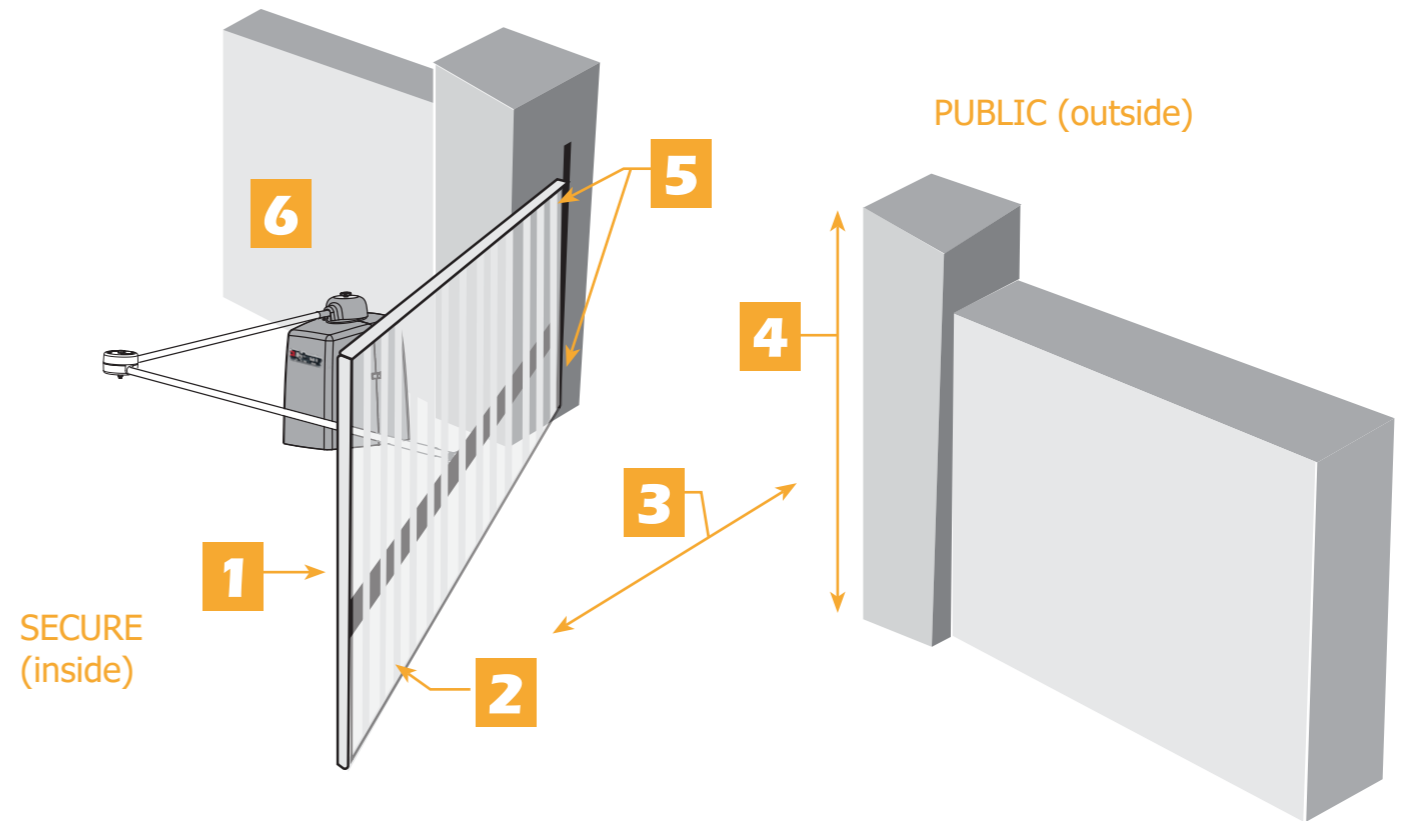

Do you have 2

**independent safety
devices installed at
each entrapment zone ?**

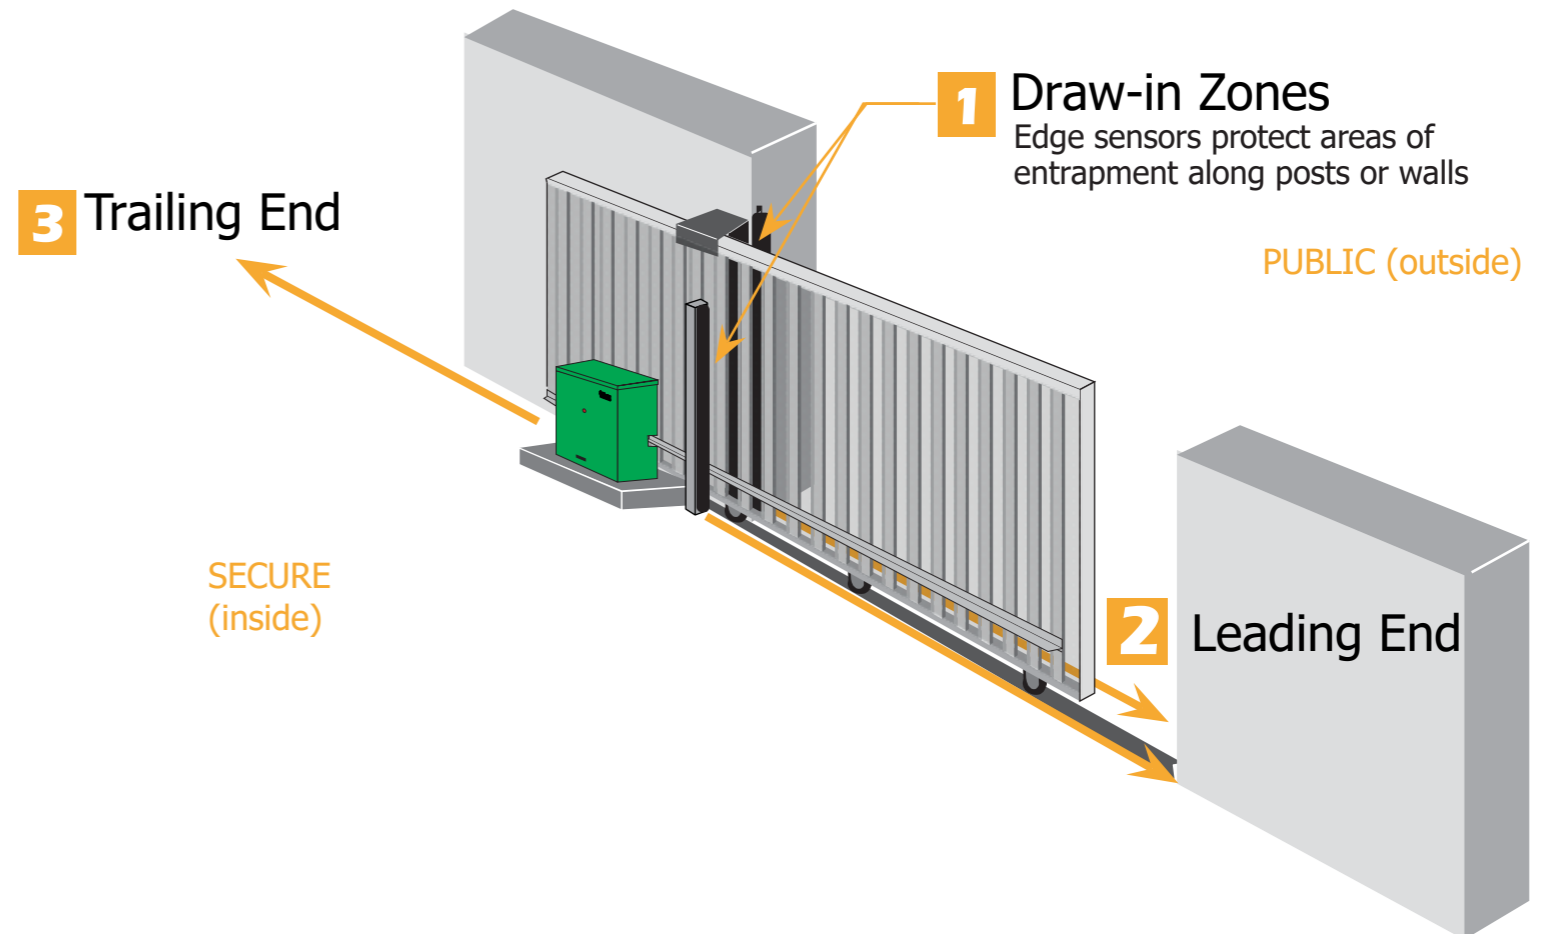

***Photo-Eyes or Safety Edge**

Potential Zones for Entrapment Protection

- 1) Leading Edge
- 2) Bottom Edge
- 3) Entry/Exit
- 4) Posts
- 5) Post Pivot/Pinch Points
- 6) Arm Movement

- 1) Draw-In Zones
- 2) Leading End
- 3) Trailing End

UL325 Standards

(Underwriters Laboratory)

- ✓ Gate Operator approved to current standards
- ✓ Proper gate warning signs attached to both sides of gate area
- ✓ Each entrapment zone protected by 2 safety devices/obstruction tested

Installation Standards

- ✓ Only install operator on gates used for vehicular traffic.
- ✓ A separate pedestrian entry/exit must be clearly visible to promote pedestrian usage. It must also be located away from vehicle gate so pedestrians do not come in contact with it.
- ✓ Install both primary & secondary devices to protect each entrapment zone.
- ✓ Pickets of a slide gate must be designed/screened to prevent persons from reaching/passing through a gate.

Make Safety your Priority.

Schedule your free consultation to ensure your gates and operators are UL325 Safety Compliant.
